```java
import java.util.Scanner;
public class email {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        System.out.println("Enter the number of email id : ");
        int n= sc.nextInt();

        String arr[] = new String[n] ;
        System.out.println("Enter the Email Id : ");
        for(int i=0;i<n;i++)
        {

            arr[i]=sc.next();
        }
        System.out.println("Enter the emailid to be searched : ");
        String ch= sc.next();

            for(String ch1 : arr)
            {
               if(ch1.equals(ch))
               {
                   System.out.println("The Email is Found in the array of Email ID ");

               }

            }

    }

}
```
